# Compare Three-Digit Numbers

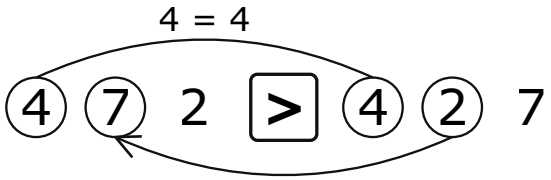

BrightPage.ai

**Instructions**

1. Compare the hundreds digits first: the number with more hundreds is greater.
2. If they are the same, compare the tens, then the ones.
3. Write > if the first number is greater, < if it is less, or = if they are equal.

**Example**

7 is bigger, so 472 is greater than 427.
