Read a Bar Graph

BrightPage

Instructions

1. Read the labels under the bars.
2. Find the bar the question names and read across to the number at its top.
3. To find how many more, subtract the smaller number from the bigger one.
4. To find how many in all, add every bar.

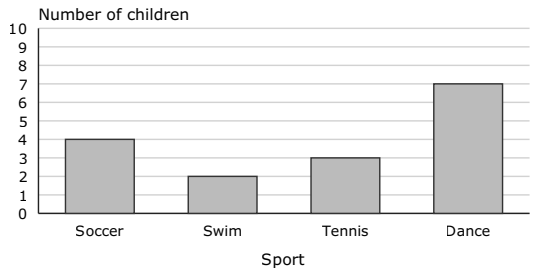

Example

How many more swim than dance?

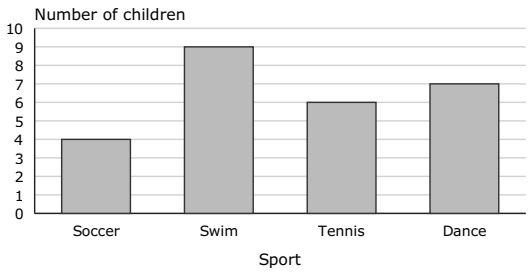

7

1

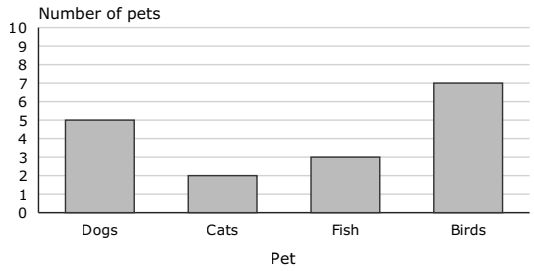

How many soccer?

2

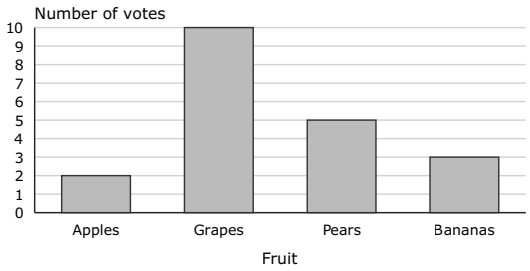

How many children in all?

3

How many more birds than cats?

4

How many more grapes than apples?
