Subtraction with Regrouping

FREE PRINTABLE · GRADE 2

BrightPage

Instructions

1. Subtract one place at a time, starting with the ones.
2. Regroup from the next place when the top digit is too small.

Example

$$\begin{array}{r} 32 \\ -\ 24 \\ \hline 8 \end{array}$$

1. Start at the ones column. If the top digit is too small, borrow ten from the next place, then subtract. **take one from the 3 next door: 3 → 2; 12 − 4 = 8**
2. Work along the columns to the left the same way. **2 − 2 = 0**
3. Read the digits you wrote under the line: that is the answer. **32 − 24 = 8**

1

$$\begin{array}{r} 944 \\ -\ 286 \\ \hline \end{array}$$

2

$$\begin{array}{r} 627 \\ -\ 128 \\ \hline \end{array}$$

3

$$\begin{array}{r} 88 \\ -\ 79 \\ \hline \end{array}$$

4

$$\begin{array}{r} 81 \\ -\ 78 \\ \hline \end{array}$$

5

$$\begin{array}{r} 58 \\ -\ 29 \\ \hline \end{array}$$

6

$$\begin{array}{r} 352 \\ -\ 248 \\ \hline \end{array}$$

7

$$\begin{array}{r} 50 \\ -\ 43 \\ \hline \end{array}$$

8

$$\begin{array}{r} 800 \\ -\ 392 \\ \hline \end{array}$$
