Instructions

1. Multiply the ones, then the tens, then the hundreds.
2. Carry into the next place when a product is ten or more, and add the carry to that place.

Example

$$\begin{array}{r} 38 \\ \times \quad 3 \\ \hline 114 \end{array}$$

1. Multiply the top number by the ones digit of the bottom number, one column at a time, carrying where you need to.
   8 × 3 = 24; write 4, carry 2
   3 × 3 + 2 = 11; write 1, carry 1
   Write the remaining carry: 1
   38 × 3 = 114
2. Read the digits you wrote under the line: that is the product.
   38 × 3 = 114
