Rounding Decimals

BrightPage

Instructions

1. Underline the digit in the place you are rounding to and look at the digit to its right: 5 or more adds one to the underlined digit, 4 or less leaves it.
2. Drop the digits after it, or change them to zero if they are before the decimal point.
3. Do this for each place: the hundredths, the tenths, the ones and the tens.

		hundredths	tenths	ones	tens
Example	**72.162**	**72.16**	**72.2**	**72**	**70**
1	**98.757**				
2	**72.288**				
3	**55.393**				
4	**16.494**				
5	**92.131**				
6	**48.075**				
7	**37.873**				
8	**75.784**				
9	**37.948**				
10	**54.589**
